UL is Cybersecurity Leader of the 2018 Eurovent Summit

Global testing and certification company to emphasise Cybersecurity in European HVACR solutions

Brussels, Carugate, 29 June 2018. UL, a global service provider to the HVACR industry and beyond, has become the official Cybersecurity Leader (sponsor) of the 2018 Eurovent Summit in Seville, Spain. UL is going to emphasise its cybersecurity approach and expertise during Europe's major gathering for key HVACR decision-makers.

Founded in 1894 in the United States, [UL](#) utilises its safety knowledge and experience to focus on a new generation of safety challenges and support new industries and stakeholders in creating a safer living and working environment. In the area of HVACR, UL's services focus on certification, auditing, testing, advising and educating. With this sponsorship, the company underlines the importance of safe and efficient HVACR solutions, and its recent expansion to European countries. Summit participants are also going to receive dedicated seminars on how to effectively export to the US's HVACR market.

Brian Ferriol, Global Business Development Director of UL's Appliances, HVAC and Lighting states in this respect: "UL is pleased to sponsor such a meaningful event in the HVAC sector in Europe. With more than 400 manufacturers, industry associations, engineering societies, laboratories and political decision-makers, the Summit has developed into a major meeting place of our industry. With the exponential growth in Internet-connected devices, we are taking this opportunity to provide support in those areas where our expertise and knowledge can make a difference to our clients."

This year's **EUROVENTSUMMIT** will see a particular focus on Southern European markets. Key events include a dedicated Workshop for Installers in Spanish by the Spanish federation [CONAIF](#), the Spanish Industry Symposium organised by [AEFYT](#) and [AFEC](#) (in English and Spanish), and the [Eurovent Innovation/HUB at the Naval Museum](#) including a presentation given by UL representatives. Stay tuned for updates on the speakers and purchase a **EUROVENTSUMMIT** ticket via www.eurovent-summit.eu and <https://www.linkedin.com/showcase/eurovent-summit/>.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit www.eurovent.eu

Democratic decision-making

DEMOCRATIC DECISION-MAKING

Activities rest upon democratic decision-making procedures between members and their representatives

'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers

Voting rights independent from amount of membership contributions or company sizes
