Corrosion protection of Air Handling Units in spotlight of newest Eurovent Industry Recommendation

Publication provides comprehensive guidance to manufacturers and designers

Brussels, 09 September 2021. The long awaited Eurovent Recommendation 6/16 has been published. Developed by the Eurovent product Group 'Air Handling Units' (PG-AHU), this Code of Good Practice focuses on the corrosion protection of Air Handling Units. The document is freely available to the public.

The document discusses fundamentals of corrosion protection, explains the corrosivity categories of the environment and provides practical guidance on recommended properties of materials and corrosion protection measures depending on the respective environmental corrosivity.

Martin Lenz, Chairman of Eurovent PG-AHU, remarked: "Given that Air Handling Units are normally designed for 15-20 years of operation, the manufactures and system designers are often faced with the problem of correct selection of materials and corrosion protection means properly matched to the corrosivity of the environment. There appears to have been a lack of comprehensive guidance in this area to date, and this recommendation fills that gap."

The Eurovent Recommendation 6/16 is available for download free of charge in the Eurovent Document Library: <https://eurovent.eu/?q=content/eurovent-616-2021-corrosion-protection-air-handling-units-first-edition>.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
