Eurovent to conduct Energy Efficiency Seminar during Refrigeration & HVAC Indonesia

Education on efficient technologies part of focus in emerging markets

Brussels, Jakarta, 5 September 2018. As one of the world's largest industry associations for Indoor Climate, Process Cooling and Food Cold Chain Technologies, Eurovent is set to support emerging markets with educational programmes by sharing knowledge on energy efficient technologies. A seminar on Energy Efficiency will be held during the 2018 Refrigeration & HVAC Indonesia in Jakarta.

Embedded in Indonesia's leading industry exhibition Refrigeration & HVAC Indonesia, taking place from 26 to 28 September 2018 at Jakarta's main exhibition venue JIExpo Kemayoran, the specialised seminar conducted by Eurovent will focus on energy efficient solutions in various applications on the second day of the exhibition, 27 September.

Markus Lattner, Director of Eurovent Middle East and coordinator of the event said:

"Indonesia is the world's 4th most populated country. The economic indicators show a significant growth of its middle class over the past decades. However, the positive development takes its toll on energy consumption and results in a growing demand for cooling and refrigeration applications. No country in such a position can nowadays ignore the requirement to increase the efficiency across its electrical infrastructure. Indonesia certainly acknowledges that this is yet a weak point and that more efforts have to be made. Eurovent strongly believes that as an industry, it is our responsibility to assist countries in such position with our experience and knowledge."

In the seminar, three members of Eurovent, who are active within the region, will elaborate on different aspects related to saving energy, highlighting practical solutions which are ready to use:

- **Session 1:** How latest EC Fan Technology improves air-side Efficiency in Buildings
Speaker: Mr Torang Panjaitan (Country Manager, ebm-papst Indonesia)
- **Session 2:** Using Air Curtains to reduce energy waste in cooled environments
Speaker: Mr Jonas Elmnäs (Export Manager, Frico AB)
- **Session 3:** New level of heat exchangers
Speaker: Mr David Widjanarko Poerwosunu (Director, Güntner Indonesia)

Refrigeration & HVAC Indonesia has been selected as cooperation partner due to the fair's leading position in the Indonesian market. It has developed from and takes place parallel to the International Indonesian Seafood and Meat exhibition, which attracts a strong attendance from the cold chain industry and enjoys the support of the Indonesian government. Eurovent members receive preferential rates for exhibiting. The fair is organised annually and is recommended to manufacturers who are interested to enter the local market.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit www.eurovent.eu

Democratic decision-making

DEMOCRATIC DECISION-MAKING

 Activities rest upon democratic decision-making procedures between members and their representatives

 'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers

 Voting rights independent from amount of membership contributions or company sizes
